SUPPORT YOUR LOCAL SUBVERSIVE RAVERS

The next time you go to an after hours party where the music is wholly or predominantly characterised by a series of rhythmic or repetitive beats, consider the following. When the forces of their law and general biospherical disorder turn up, don't leave immediately. The party providers are risking alot to put on the sounds, even if they are charging. Lend them a little support, No-one is asking you to get nicked at 5am on a Sunday, but if 500 people said "Go away officers, this is a happening do, man. Join the song and dance, don't ban it. Admit." Protect the rig. Don;t riot, just don't stop dancing. KBC will be fund raising for a substantial kamikaze sound system. Come along to Clubversive and help us save up for it.

TRAFFIC CHAOS ON THE M77

You thought they were just a bunch of tree hugging, dirty smelly hippies didn't you? Oh you didn't? You realised that when the Battle for Pollok Free State was in full swing that these tree huggers were actually highly motivated visionaries. How do we know this? They said that the M77 would soon clog up. The problem wasn't, and isn't the lack of roads, but the number of cars on the existing roads. Especially the number of cars with only one person in them. (Around 80% .) Check this fact out at your nearest traffic lights. Anyway, morning rush hour on the road to nowhere now backs up to Corkerhill. KBC is taking bets on how long it will take to back up to Darnley, and then to Newton Mearns. It probably won't bother the Mearnsyites because they can afford top of the range anti-pollution masks for themselves and their kids. Now our non-seeing, bribe-taking, alcoholic leaders have given the go ahead for a further 10 mile extension to the M77. Our guess is that they have shares in the Anti-pollution mask industry. Maybe they'll land a hand with a fair swing of the pick-axe (after a few G&T's). Look out for some other unusual happenings on this road, and any others, in the coming months. Join in, have a laugh while you can. We have 9358 days to save the planet. KBC road reports.

CRITICAL MASS - ReCycling the roads

Welcome back after the long winter recess CM folks - we've missed you! The Mass features add manner of people -powered transport taking a very leisurely ride through your choice of Glasgow's most scenic beauty spots; Sauchiehall Street, George Square, the Expressway, anywhere they feel like really.

Meet on Saturday 26 April at 2pm by the recycling point on the **corner of Byres Road & University Ave.**

This is easily recognisable as the site of the only cyclist friendly Advanced Stop Junction in Glasgow. Let's all sing thanks to our glorious City Council for their generosity. (Well, they were pretty skint after spending all that money on the "great value" M77 & you can't get to a Caribbean junket on a bike.)

RECIPE OF THE MONTH -SCOTCH PANCAKES

A tasty and filling snack - Just the job for round the campfire after a hard day staying entirely within the law.

Ingredients (for 6 pancakes):

1 cup of flour, 2 tablespoons of sugar, 3/4 cup of milk.

What you do: Mix the sugar and flour together in a bowl and beat in the flour to form a thinish batter.

Heat a little oil in a frying pan until well hot.

Pour in some of the mixture & fry until the air bubbles have come through the top,then turn over and cook the other side.

Dish up and serve with whatever you can get together.

A BIT OF POLITICS.

Way down south Uncle John decides that he doesn't want to be crime minister just now in case those nasty folks across the road start picking on his friends and accuse them of taking bribes to spout of in the world's oldest talking shop. You see the 30 grand WE pay them to ignore us just isn't enough when you consider all the drink, drugs, rent boys, mistresses (& their offspring) they have to support. Then there's the matter of time - they can't afford to arse around in Westminster when they have a legitimate arms tradi... er, business interests to be getting on with. Only the very fortunate, like Old Nick Soames and his infernal master get to do this on Company time. So we don't get to hear about what a bunch of corrupt and useless tossers they all are... they don't want us to get the wrong impression, Never mind, come May that nice man Big Brother Blair will be in charge and it'll all be alright. Won't it?

Meanwhile, back home, our beloved leaders continue to wield the axe. So it's adieu to advice centres for the homeless & those of us living in poverty. Who needs a Drop-In Centre for drugs rehabilitation and counselling when you can have a nice high profile media campaign instead. What's a few thousand jobs amongst friends. They are our friends. They like us. They like us to elect them so they can go about vital fact finding missions and drive around in their "very economical" limousines... we wouldn't want them to look cheap now would we?

Democracy *di-mok'ro-si n.* a form of government on which the supreme power is vested in the people collectively, and is administered to them by officers appointed by them. Seems strange that these democratically elected officers need to use public employees i.e. the police to "protect" them from the people who elected them. Mmmm... can't quite. work that one out???

KBC This type of news reporting isn't unusual. It's inevitable. Isn't everything? We don't believe so. We don't believe that the spiral of economic, social and environmental decline is unstoppable. We do believe that by standing up to corrupt politicians, antiquated systems of government, and unaccountable multinational corporations we reclaim the future for ourselves and future generations of drinkers, lovers and revellers generally. We have no choice. At least, not if you want a choice. KBC advocates that we all are ALLOWED to choose from more than one type of potato (not a genetically altered one please). KBC advocates the use of public transport. KBC will be seen on the streets, will be heard on the airwaves, will be seen at all the best parties (that we find out about) and will continue to advocate a rise in the level of consciousness individuals, and consequently of the planet.

Okay, so here it is.

No sexy models or groovy graphics. Just a car that runs on Sunlight. Made in the most technologically advanced country in the world.

Impressive isn't it??

They made it especially.
So that those of us unlucky enought to be alive once the ozone layer's shot to fuck can drive through what used to be the countryside.

I feel so good about it.

What is this KBC nonsense? We're not sure but we kind of like it that way, Eventually though we'll have to define ourselves for the benefit of the media circus which we will generate. Come along to Clubversive & tell us what you think of us. Become a member - 1 member, 1 vote.Are we evolutionaries or are we numties? Again, we don't know but we're trying to find out. What we do know is that social change can be achieved in many ways. Come give KBC your news & views.

Fuck the system...Up the sound system.
